20 Best iPad Apps - Citrix Receiver20. Citrix ReceiverCitrix System; www.citrix.com This isn't for everyone, but Citrix Receiver lets enterprise users access windows 7 virtual desktops that are secure from iPad. Apple's purist can smirk at the idea, but the app provides an interesting roundabout way to multitask or even run Flash on an iPad. Citrix Receiver is connected to Microsoft Office, Firefox, Photoshop, GoToMeeting, and other professional software running on separate Windows 7 machines. The app offers secure communication, plus a custom, icon-oriented Workspace view, as well as a standard virtual desktop view—complete with a Windows taskbar. Page 2Sanat 20 Best iPad Apps - Loopt Pulse19. Loopt PulseLoopt Inc.; www.loopt.com own, Loopt Pulse helps you find interesting places and events near any location, including concerts, restaurants and bars. It connects to Facebook Connect, lets you share recommendations or learn what places your friends visit frequently. Depending on its location, the database is comprehensive or spotty. The look of the photo is less impressive: Screenshots look pretty on iTunes, but the actual app uses stock photos for many nearby New York City events during the review period. However, having this app can mean the difference between a fun night, and one on the couch in front of the TV. Page 3Reuters News Pro18. Reuters News ProThomson Reuters; www.reuters.comReuters News Pro provides esteemed core newswire market products, news, and data, with broader experience than NPR magazine-style apps or Bloomberg financial weight applications, though arguably not as deep as others. Reuters News Pro is also running slightly slower in its current iteration (1.0.3). That said, the app features dozens of customizable categories, personalized watch lists for business news, and geographic-specific news views. Nice touches include a currency converter and a staggering amount of video coverage. Page 4Zinio17. ZinioZinio LLC; www.zinio.comWhat iBooks and Kindle do for books, Zinio does for magazines—with some caveats. Again, the iPad form factor that neither here nor there ended up being true. It's big enough and sharp enough to display accurate content in full color, while much more portable and prettier than a bookshelf full of dog-eared zines". The warning: the rendering page should be much faster, and there is a limit to the number of issues you can archive or even read in the first place. But many high-quality magazines live here digitally: National Geographic, Spin, Car and Driver, BusinessWeek, The Economist, and PCMag to name a few. Page 5 Best iPad Apps 20 - Harbor Master HD16. Harbor HDImangi Studios LLC; www.imangi.comHarbor Master, now in high resolution on iPad, lets you steer the boat to the dock, watch it (quickly) unload, and then steer them off the screen—hopefully without crashing into another boat in the process. This expansive version looks sharper, sharper, offers a better gaming experience thanks to larger boards. The game comes with six docks, two types of cargo, and a new Treasure Island level. If you like Flight Control on your iPhone, but don't want to pay \$4.99 for the iPad version, this is your game. The speed picks up very quickly, though; it's better to grab a coffee first. Page 6Susing 20 Best iPad Apps - WeatherBug Elite for iPad15. WeatherBug Elite for iPadAWS Convergence Technology; www.aws.com, www.weatherbug.comWeatherBug Elite is a supersized information panel for weather geeks. It offers animated radar maps, plus current conditions, real-time cameras, six-day forecasts, and hourly forecasts all on the home screen. Flick the right bar down, and you'll see active weather alerts and the latest video forecasts. Tap one of the widgets, and it will explode into a larger pop-up view on the main screen. The interface can use some smoothing. Nevertheless, this weather app blows stock iPhone widgets into weeds full of pollen. Page 7Wikipanion14. WikipanionRobert Chin; www.wikipanion.netWikipanion for iPad turned Wikipedia content into a more readable mode of iPad. Wikipanion filters all HTML and meta-data, sorting them into beautiful, content-driven interfaces. The left side displays the table of contents at all times, and the app always remembers the font size settings of your choice. The search box includes a type-ahead feature for general terms. You can also tag favorites. The app even tracks page history based on the date of visit, plays back embedded .ogg audio, and saves images to your iPad photo library. Most people will be very happy with the free version, but researchers will love the \$4.99 Plus upgrade, as it quickly queues up links to read later, and saves pages for offline perusal. Page 8Sanat 20 Best iPad Apps - Aurora Feint 313. Aurora Feint 3Aurora Feint Inc., www.aurorafaint.comAurora Feint 3 gives iPad owners their first crack at the popular iPhone-based puzzle game. The new version connects to the same OpenFeint mobile social gaming network as before. The game itself features beautiful graphics and a beautiful soundtrack. It's billed as a massive multiplayer online game, but it's really a puzzle game at heart, not a Clone of World of Warcraft. Although the game is free, you can buy a four-life plan for 99 cents—and you may need to sooner rather than later. iPad allows for a higher class of applications, not in terms of production quality but in terms of what they can do—and what they can allow us to do. That's because they paint on a larger canvas. More isn't always better but when you can see more and do more bigger screen, it's actually better. That's part of the reason the iPad App Store has been so successful, with hundreds of thousands of tablet-optimized apps in each category. But it presents iPad owners with problems - how do you sort out so much and find the best one for you? If you're new to iPad, which apps you to download now? Avoid cars and go the other way, and challenge your friends to do the same! Fallout Shelter Bethesda dropped it from the park when they made Fallout Shelter, and it was a game that kept me coming back to time and time again. You are in charge of the Vault - an underground bunker built to protect people from nuclear war - and the future of the community of people in your vault depends on your decision. You have to make people happy, but also safe, in this crazy post-apocalyptic world. One of my favorite things about Fallout Shelter is Bethesda's ongoing support for Fallout Shelter. The game launched in 2015 and still receives updates, special events, and new content from developers, keeping the game fresh for players you've played since the beginning. If you're a fan of the Fallout video game series, Fallout Shelter will appreciate your knowledge with familiar names, jokes, and events; however, this game offers a lot of excitement and challenges for newcomers as well, making it a fantastic game for everyone. Fire Emblem Heroes Fire Emblem Heroes is an excellent game. Whether you're a long-running fan of the series or a complete newcomer, Nintendo has designed a game that makes both groups happy. Although the progress of the game has all the advantages of a typical freemium game, such as needing to spend money to reach the top of the leaderboard or waiting various periods of time to unlock game items, you don't have to spend money to enjoy 95% of what Fire Emblem Heroes has to offer. Fire Emblem Heroes is visually stunning, and it's clear to anyone who plays it that Nintendo puts a lot of time and effort into making this game, which means I'll enjoy putting a lot of time and effort into playing it.
